EDUCATION

Manipal University Jaipur

B.Tech. in Computer Science Engineering (AI & ML) – CGPA: 9.25/10 | 4x Dean's List, 3x SCSE Awards

Aug 2023 – Jun 2027

Jaipur, India

EXPERIENCE

Research Intern – 5G/6G AI-Driven Networking

Indian Institute of Technology (IIT) Delhi

May 2026 – Present

New Delhi, India

- Selected as a Research Intern under the Indian Institute of Technology Delhi 5G–6G Research Translation Project, contributing to next-generation wireless communication research and AI-driven network optimization.
- Developing machine learning and deep learning models for network slicing, resource allocation, traffic forecasting, and Quality of Service (QoS) optimization in intelligent 5G/6G networks.
- Designing edge intelligence frameworks and transformer-based traffic prediction systems to enable ultra-low-latency decision-making, efficient resource management, and scalable network operations.

Web Development Intern

NullClass Pvt. Ltd. (Remote)

Aug 2025 – Oct 2025

India

- Built **BookMySeat**, a full-stack movie ticket booking platform (Django, SQLite) with real-time seat allocation, Razorpay payment integration, and automated reservation timeout handling.
- Engineered relational DB workflows, email notification services, and admin analytics dashboard; deployed on PythonAnywhere handling end-to-end booking and payment flows.
- Implemented REST API layer between Django backend and responsive Bootstrap frontend, supporting **3 concurrent user workflows**: browsing, booking, and payment simulation.

TECHNICAL SKILLS

Languages: Python, C, C++, JavaScript, SQL

Full-Stack & Web: Django, Django REST Framework, Flask, FastAPI, React.js, REST APIs, HTML, CSS, Bootstrap, AJAX

AI/ML & CV: PyTorch, OpenCV, YOLOv4, Hugging Face Transformers, LLMs, NLP, Deep Learning, RAG, Gemini API

Databases & DevOps: PostgreSQL, MySQL, SQLite, Docker, Git, GitHub, Postman, Grafana, Prometheus, Render, Vercel, PythonAnywhere, Cursor

PROJECTS

GoalSync – AI-Powered Enterprise Performance Management System

Python, Django 5, PostgreSQL, React.js, Chart.js, Gemini API, Render, Gunicorn

May 2026

- Developed a full-stack SaaS performance management platform with role-based dashboards for employees, managers, and HR administrators, using Django, PostgreSQL, and secure authentication.
- Built RESTful APIs for goal tracking, KPI analytics, and approval workflows, and integrated Gemini API and Ollama to generate AI-powered performance summaries and insights.

AI-Powered Misinformation & Deepfake Detection Platform

Python, Flask, React.js, OpenCV, Hugging Face, LLMs, NLP, Computer Vision

Aug 2025

- Built a multimodal AI platform detecting manipulated text, audio, and video using transformer-based NLP and CV models with cross-modal verification and Grad-CAM heatmap visualization.
- Cut manual deepfake review time by **5 hours/video** via LLM-generated authenticity summaries; full Flask–React deployment as solo engineer placed **Top 15/500+ teams** at HackSky'25.

Real-Time Object Detection with Audio Feedback

Python, OpenCV, NumPy, pyttsx3, YOLOv4

Jan 2025 – Feb 2025

- Developed a YOLOv4-based real-time object detection system capable of accurately identifying multiple objects from live video streams.
- Integrated text-to-speech feedback and accessibility features to provide real-time auditory assistance for visually impaired users.

ACHIEVEMENTS

Patent Published (India) – Accessibility Assistant for Visually Impaired

Jan 2025 – Aug 2025

OCR | AR-based navigation | YOLOv4 | ARKit/ARCore

- Published patent for an AI-powered accessibility system integrating OCR, YOLOv4 object detection, AR-based navigation (ARKit/ARCore), and voice-guided assistance to improve independent mobility for visually impaired users.

LeetCode – 396 Problems Solved

2024 – Present

Rank 298,722 | 100 Days Badge 2026 | Max Streak: 52 Days

- Solved 396 algorithmic problems (168 Easy, 196 Medium, **32 Hard**); earned 100 Days Badge 2026 with consistency across Dynamic Programming, Divide & Conquer, and Backtracking.

HackSky'25 – Top 15 / 500+ Teams

Aug 2025

MIT Bangalore

Bangalore, India

- Built and deployed a full-stack AI deepfake detection platform solo; secured Top 15 among 500+ teams, reducing video review time by **5+ hours** via heatmap-based pipeline visualization.
