[Portfolio: my-portfolio](#)

Computer Science Engineering student specializing in Artificial Intelligence, Machine Learning, and Full-Stack Development. Experienced in developing AI-driven and scalable web applications, with a passion for building innovative technology solutions that address real-world challenges through practical and efficient approaches.

Education

- Manipal University Jaipur Aug 2023 - Present
B.Tech in Computer Science Engineering (AI & ML)
CGPA: 9.25 (till 6th sem)
- Diamond Public School, Moradabad Apr 2021 - Mar 2023
Senior secondary - CBSE
Percentage: 80.6%

Skills

Programming & Databases: Python, C, C++, SQL, JavaScript, MySQL, SQLite

AI / Machine Learning: PyTorch, Supervised & Unsupervised Learning, Deep Learning, Computer Vision (OpenCV, YOLOv4), Natural Language Processing (NLP), LLMs, Hugging Face Transformers, Recommendation Systems, RAG

Backend & Web Development: Django, Django REST Framework, Flask, FastAPI, REST APIs, HTML, CSS, JavaScript, React.js, AJAX, Bootstrap

Tools & Platforms: NumPy, Pandas, Git, GitHub, Postman, Docker, Razorpay API, PythonAnywhere

Projects

AI-POWERED MISINFORMATION & DEEPFAKE DETECTION PLATFORM Aug 2025

- Built a multimodal AI platform for detecting manipulated text, audio, and video using transformer-based NLP and computer vision models.
- Implemented cross-modal verification, Grad-CAM heatmap visualization, and LLM-generated authenticity summaries with Flask-React integration.
- Tech Stack: Python, OpenCV, Hugging Face, LLMs, Flask, React.js, NLP, Computer Vision

BookMySeat – Online Movie Ticket Booking System Aug 2025 - Oct 2025

- Developed a Django-based ticket booking platform with real-time seat allocation, Razorpay payment integration, and automated reservation timeout handling.
- Designed relational database workflows, email notification services, and an admin analytics dashboard for efficient booking management.
- Tech Stack: Django, Python, HTML, CSS, JavaScript, Razorpay API, SQLite, Bootstrap, PythonAnywhere

REAL-TIME OBJECT DETECTION WITH AUDIO FEEDBACK Jan 2025 - Feb 2025

- Engineered a YOLOv4-based real-time object detection system using OpenCV with low-latency video inference and multi-object recognition capabilities.
- Integrated text-to-speech feedback for accessibility assistance, enabling continuous verbal object identification for visually impaired users.
- Tech Stack: Python, OpenCV, NumPy, pyttsx3, YOLOv4

GOALSYNC – AI-POWERED ENTERPRISE PERFORMANCE MANAGEMENT SYSTEM May 2026

- Developed a production-ready full-stack enterprise performance management platform with role-based dashboards for employees, managers, and HR administrators using Django 5 and PostgreSQL.
- Implemented goal tracking workflows, KPI analytics, AI-powered performance insights, approval systems, and organization-level dashboards with secure authentication and cloud deployment on Render.
- Integrated Gemini API and Ollama-based AI modules for intelligent recommendations, executive summaries, and enterprise analytics automation.
- Tech Stack: Python, Django, PostgreSQL, HTML, CSS, Bootstrap, JavaScript, Chart.js, Gemini API, Render, Gunicorn, WhiteNoise

Experience

Research Intern, IIT Delhi May 2026 - Present

- Selected for a Research Internship at Indian Institute of Technology Delhi under the 5G–6G Research Translation Project focused on next-generation wireless communication and AI-driven networking.
- Exploring 5G/6G architecture, edge intelligence, and network optimization for future communication systems.

Web Development Intern, NullClass Pvt. Ltd. (Remote) Aug 2025 - Oct 2025

- Implemented API-driven communication between the backend and a responsive frontend to support browsing, booking, and payment flow simulations.

HackScky 25 Hackathon, MIT Bangalore Aug 2025

- Secured a top 15 position among 500+ teams at the HackScky hackathon by developing an innovative AI platform to combat misinformation and deepfakes.
- Added heatmap visualization to the video analysis pipeline, enabling rapid identification of deepfake indicators and reducing manual review time by 5 hours per video, as a solo engineer.

Junior Head – Graphic Design, Cyber Space Club, MUJ Aug 2024 - May 2025

- Managed a 5-member design team delivering visuals for 10+ events, improving social media engagement and student participation.

Publications

Accessibility Assistant for Visually Impaired

Patent Published – An AI-powered assistance system for visually impaired users that combines OCR, real-time object detection, AR-based navigation, and voice-guided feedback to enhance accessibility and independent navigation using YOLOv4, ARKit, and ARCore.

Achievements

- Dean's List - Achieved a 9.32 GPA in the 3rd semester (2024), 9.48 GPA in the 4th semester (2025), 9.71 GPA in the 5th semester (2025) and 9.53 GPA in the 6th semester (2026).
- Secured a place among the Top 15 teams out of 500+ in Hackscopy 25 Hackathon, recognized with a certificate for outstanding participation.
